Solutions

WITH CONFIDENCE

RESPONSIBLE INVESTING PHILOSOPHY

Investment Solutions views responsible investing as an investment practice that integrates factors that may materially affect the sustainable performance of assets, including those of an environmental, social and governance (ESG) nature.

The company recognises the onerous responsibility placed on it by clients to not only achieve the best possible returns at acceptable levels of risk, but also to act in the best interests of the community and environment within which it operates.

Investment Solutions is particularly well positioned to collaborate with players in the SA asset management industry and actively engage asset managers on issues relating to responsible investing. The company believes asset managers that incorporate ESG factors into their decision making processes are better positioned to make quality investment decisions and more likely to improve the risk characteristics of their portfolios.

Investment Solutions believes in achieving responsible and sustainable benchmark beating returns (responsible alpha) by ensuring that the company, and the asset managers it selects, consider and evaluate the risks and opportunities arising from the consideration and incorporation of ESG factors.

Investment Solutions' embraces the principles of active engagement, both in terms of its own engagement with underlying asset managers, as well as the asset managers engagement with the underlying corporate and/or institutions, that they invest into. The objective is to encourage asset managers, both local and global, to consider and incorporate appropriate responsible investing practices into their investment decision making process, and to provide evidence that these practices are being applied.

Investment Solutions is a signatory to the United Nations Principles for Responsible Investment and endorses the Code for Responsible Investing in South Africa (CRISA).

Investment Solutions Limited is a licensed financial services provider in terms of Section 8 of the Financial Advisory and Intermediary Services Act, 37 of 2002, as amended, FAIS licence number 711. This information is not advice as defined and contemplated in the Financial Advisory and Intermediary Services Act, 37 of 2002, as amended. The value of a portfolio can go down, as well as up, as a result of changes in the value of the underlying investments or of currency movement. An investor may not recoup the full amount invested. Investment returns are calculated via Statpro Performance and Attribution. Actual investment performance will differ based on the fees applicable, the actual investment date and the date of reinvestment of income. Past performance is not necessarily an indication of future performance. Global allocation, as permitted by the portfolio mandates, is subject to availability of appropriate global capacity.
